About me

I learned programming and web development through the open-source community and have been actively involved in its development and maintenance ever since. I love solving problems and building projects independently, while at the same time, I do my best to be a valuable team member and learn from my colleagues.

Technical Skills

Front end	Back end	Tools & Technologies	Testing
• HTML5	• Node.js	• Git / GitHub	• Test-Driven Development
• CSS3	• Express	• Linux Terminal	• Jest
• JavaScript	• PostgreSQL	• Postman	• Vitest
• React	• Prisma	• Vite	
• TailwindCSS	• REST API	• Webpack	

Projects

Memory Game

A simple memory game with Pokémon cards built with **React** and bundled with **Vite**. Fetches Pokémon cards via *pokeapi.co* ↗ . Hosted on **Netlify**.

GitHub repo - https://github.com/goran1010/memory-card-game ↗ *| Demo - https://memory-card-top-project.netlify.app* ↗

Where's Waldo?

A web application for the "Where's Waldo" game. Front end built with **React** and styled using **CSS modules**. Used *react-zoom-pan-pinch* for effective image manipulation. Back end built with **Express** and **Prisma**, with **JWT** authentication. Front end hosted on **Netlify**, back end on **Koyeb**.

GitHub front-end repo - https://github.com/goran1010/waldo-front-end ↗
GitHub back-end repo - https://github.com/goran1010/waldo-back-end ↗

Totally Not Twitter

A light clone of Twitter (X). Front end built with **React** and **TailwindCSS**. Back end built with **Express** and **Prisma**, and using session-based authentication with *Passport*. Front end hosted on **Netlify**, back end on **Koyeb**.

GitHub front-end repo - https://github.com/goran1010/TotallyNotTwitter-FrontEnd ↗
GitHub back-end repo - https://github.com/goran1010/TotallyNotTwitter-BackEnd ↗

Weather App

A weather app showing current conditions for a selected location along with a relevant GIF. Built with vanilla **HTML**, **CSS**, and **JavaScript**. Bundled with **Webpack**. Fetches data from *giphy.com* ↗ and *weather.visualcrossing.com* ↗ .

GitHub repo - https://github.com/goran1010/weather-api-test ↗ *| Demo - https://goran1010.github.io/weather-api-test* ↗

Education

"Nikola Tesla" Electrical School	2006 – 2010
Computer Technician	Banja Luka

Non-formal education

The Odin Project	02/2025 – 08/2025

Online open-source web development course
After completing the course, I continued to stay involved in the program as a regular contributor, maintaining the GitHub repository and creating new lesson content for the curriculum.

Languages

English: Fluent in English, both written and spoken. Comfortable reading technical documentation and working with teams or clients.

Serbian: Native Serbian speaker, fluent in all aspects.
